Mighty Heroes – Combat Visual & Feedback Checklist

Already Good (Do Not Break)

1. Clear target indicator on selected enemy
2. Readable damage numbers with correct hierarchy
3. Action point UI is understandable
4. Enemy reaction animations exist (base stagger)
5. Camera framing keeps hero and enemies readable

Must Have (Production Baseline)

1. Hit impact flash (1–2 frames) on enemy model
2. Directional slash VFX matching attack direction
3. Ground contact shadow under hero and enemies
4. Critical hit camera micro-shake
5. Combo start visual feedback on hero (aura or pulse)

Nice to Have (After Core Polish)

1. Subtle camera zoom on critical hits
2. Soft ground impact ring on heavy attacks
3. Low-contrast environment fog for depth
4. Enemy death dissolve or fade-out
5. Subtle vignette during high-impact moments

Do Not Do

1. Overly bright environment props
2. Too many simultaneous particle effects
3. Constant camera movement
4. UI animations overlapping combat feedback
5. Environment stealing focus from combat
